Journal of Neural Transmission

All Volumes & Issues

Volume 125, Issue 6, June 2018

ISSN: 0300-9564 (Print) 1435-1463 (Online)

In this issue (12 articles)

Translational Neurosciences - Review Article

The brain as a “hyper-network”: the key role of neural networks as main producers of the integrated brain actions especially via the “broadcasted” neuroconnectomics

Luigi F. Agnati, Manuela Marcoli, Guido Maura...

» [Download PDF](#) (3458KB)

» [View Article](#)

Pages 883-897

Translational Neurosciences - Original Article

Kynurenic acid and its derivatives are able to modulate the adhesion and locomotion of brain endothelial cells

Eszter Lajkó, Bernadett Tuka, Ferenc Fülöp...

» [Download PDF](#) (1757KB)

» [View Article](#)

Pages 899-912

Translational Neurosciences - Original Article

Expression of the ADHD candidate gene *Diras2* in the brain

Lena Grünewald, Nils Becker, Annika Camphausen...

» [Download PDF](#) (2116KB)

» [View Article](#)

Pages 913-923

Neurology and Preclinical Neurological Studies - Original Article

Flavor perception and the risk of malnutrition in patients with Parkinson's disease

Dareia S. Roos, Oscar J. M. Oranje...

» [Download PDF](#) (654KB)

» [View Article](#)

Pages 925-930

Neurology and Preclinical Neurological Studies - Original Article
