## Introductory Remarks on the Chemistry of Silica and Rationale of Chapter's Assembly

### Part 1. Computational Chemistry and Characterization of Silicate Catalysts

#### Chapter 1

Computational chemistry studies of silicate materials: A guide for the non-expert 1  
*Shyam Vyas*

#### Chapter 2

Modeling the structure and spectroscopy of alkaline zeolites 29  
*Karl D. Hammond and Scott M. Auerbach*

#### Chapter 3

A comprehensive graph-theoretic approach for mechanistic and kinetic analysis of zeolite catalysis: N<sub>2</sub>O decomposition on Fe-ZSM-5 49  
*Saurabh A. Vilekar, Ilie Fishtik and Ravindra Datta*

#### Chapter 4

Application of Mössbauer spectroscopy to distinguish among local environments of iron in porous silicates 81  
*Károly Lázár*

#### Chapter 5

High data density spatial analysis of zeolite powders 103  
*L. Domokos and R. Haswell*

### Part 2. Synthesis of Ordered Meso and Microporous Silicate Structures

#### Chapter 6

From Silicalite-1 zeolite to mesoporous silica: Industrial and potential catalytic applications 121  
*G. Giordano, A. Macario, A. Aloise and J. B. Nagy*

#### Chapter 7

Novel *in situ* zeolite synthesis technique 151  
*Jan H. Koegler, Nelleke van der Puij, Chuen Y. Yeh and Anne M. Gaffney*

#### Chapter 8

Silica and aluminosilicate catalysts of hierarchical porous structure 171  
*Márton Kollár, Magdolna R. Mihályi and József Valyon*

|   |     |
|---|-----|
| <b>Chapter 9</b>  |     |
| Fundamental aspects of the synthesis, modification, characterization and catalytic testing of various silicate forms and metal nanoparticle-mesoporous silicate composite materials | 187 |
| <i>A. Sápi, R. Rémiás, A. Kukovecz, I. Pálinkó, Z. Kónya and I. Kiricsi</i>   |     |

### **Part 3. Catalysts via Isomorphous Substitution and Organic Modification of Silicates**

|  |     |
|--|-----|
| <b>Chapter 10</b>  |     |
| Isomorphous substitution in micro- and mesoporous silica-based materials | 213 |
| <i>Magdolna R. Mihályi, Ágnes Szegedi and Ferenc Lónyi</i>               |     |

|  |     |
|--|-----|
| <b>Chapter 11</b>  |     |
| Organically or metal-organically modified silicas and silicates and organosilica materials: Synthesis, characterisation and catalytic applications | 257 |
| <i>István Pálinkó</i>  |     |

### **Part 4. Silica Supported Catalysts**

|  |     |
|--|-----|
| <b>Chapter 12</b>  |     |
| Monodisperse metal nanoparticle catalysts on silica mesoporous supports: Synthesis, characterizations, and catalytic reactions | 277 |
| <i>Gabor A. Somorjai and Sang Hoon Joo</i>   |     |

|   |     |
|---|-----|
| <b>Chapter 13</b>   |     |
| Stabilisation of catalytically active metal nanoparticles and nanocomposites on silica supports | 313 |
| <i>Andrea Beck, Anita Horváth, Antal Sárkány and László Guenzi</i>                              |     |

|  |     |
|--|-----|
| <b>Chapter 14</b>  |     |
| A simple, rational method to prepare nanodispersed metal catalysts supported on silica | 345 |
| <i>John R. Regalbuto</i>   |     |

|   |     |
|---|-----|
| <b>Chapter 15</b>   |     |
| Comparison of catalytic active sites present in supported $\text{MO}_x/\text{SiO}_2$ , $\text{MO}_x/\text{AlO}_x/\text{SiO}_2$ and $\text{MO}_x/\text{ZSM-5}$ catalysts | 375 |
| <i>Edward L. Lee and Israel E. Wachs</i>  |     |

### **Part 5. Application of Silica Based Catalysts in Chemical and Petrochemical Processes**

|   |     |
|---|-----|
| <b>Chapter 16</b>   |     |
| Zeolites as catalysts in petrochemistry, biomass upgrading and fine chemical synthesis            | 407 |
| <i>Martina Bejblová, Sulaiman S. Al-Khattaf, Mohammad Ashraf Ali David Kubička and Jiří Čejka</i> |     |

|   |     |
|---|-----|
| <b>Chapter 17</b>   |     |
| Investigation of catalytic conversion of vegetable oil/gas oil mixtures                     | 435 |
| <i>M. Krár, A. Thernesz, Cs. Tóth, T. Kasza and J. Hancsók</i>                              |     |
| <b>Chapter 18</b>   |     |
| Hydrodearomatization of different prehydrogenated gas oils on noble metal/zeolite catalysts | 457 |
| <i>G. Nagy and J. Hancsók</i>   |     |
| <b>Chapter 19</b>   |     |
| Zeolites as catalyst support in hydrodechlorination reaction                                | 477 |
| <i>István Hannus</i>  |     |
