Software Engineering, Business Continuity, and Education

International Conferences ASEA, DRBC and EL 2011, Held as Part of the Future Generation Information Technology Conference, FGIT 2011, in Conjunction with GDC 2011, Jeju Island, Korea, December 8-10, 2011 Proceedings
Advanced software engineering and its applications, disaster recovery and business continuity and education and learning are all areas that attract many professionals from academia and industry for research and development. The goal of the ASEA, DRBC and EL conferences is to bring together researchers from academia and industry as well as practitioners to share ideas, problems and solutions relating to the multifaceted aspects of these fields.

We would like to express our gratitude to all of the authors of submitted papers and to all attendees for their contributions and participation.

We acknowledge the great effort of all the Chairs and the members of Advisory Boards and Program Committees of the above-listed event. Special thanks go to SERSC (Science and Engineering Research Support Society) for supporting this conference.

We are grateful in particular to the speakers who kindly accepted our invitation and, in this way, helped to meet the objectives of the conference.

December 2011

Chairs of ASEA 2011, DRBC 2011 and EL 2011
Preface

We would like to welcome you to the proceedings of the 2011 International Conference on Advanced Software Engineering and Its Applications (ASEA 2011), Disaster Recovery and Business Continuity (DRBC 2011) and Education and Learning (EL 2011) — the partnering events of the Third International Mega-Conference on Future-Generation Information Technology (FGIT 2011) held during December 8–10, 2011, at Jeju Grand Hotel, Jeju Island, Korea.

ASEA, DRBC and EL are focused on various aspects of advances in software engineering and its application, disaster recovery and business continuity, education and learning. These conferences provide a chance for academic and industry professionals to discuss recent progress in the related areas. We expect that the conferences and their publications will be a trigger for further related research and technology improvements in this important subject.

We would like to acknowledge the great efforts of the ASEA 2011, DRBC 2011, and EL 2011 Chairs, International Advisory Board, Committees, Special Session Organizers, as well as all the organizations and individuals who supported the idea of publishing this volume of proceedings, including the SERSC and Springer.

We are grateful to the following keynote, plenary and tutorial speakers who kindly accepted our invitation: Hsiao-Hwa Chen (National Cheng Kung University, Taiwan), Hamid R. Arabnia (University of Georgia, USA), Sabah Mohammed (Lakehead University, Canada), Ruay-Shiung Chang (National Dong Hwa University, Taiwan), Lei Li (Hosei University, Japan), Tadashi Dohi (Hiroshima University, Japan), Carlos Ramos (Polytechnic of Porto, Portugal), Marcin Szczuka (The University of Warsaw, Poland), Gerald Schaefer (Loughborough University, UK), Jinan Fiaidhi (Lakehead University, Canada) and Peter L. Stanchev (Kettering University, USA), Shusaku Tsumoto (Shimane University, Japan), Jemal H. Abawajy (Deakin University, Australia).

We would like to express our gratitude to all of the authors and reviewers of submitted papers and to all attendees, for their contributions and participation, and for believing in the need to continue this undertaking in the future.

Last but not the least, we give special thanks to Ronnie D. Caytiles and Yvette E. Gelogo of the graduate school of Hannam University, Korea, who contributed to the editing process of this volume with great passion.

This work was supported by the Korean Federation of Science and Technology Societies Grant funded by the Korean Government.

Table of Contents

A Novel Web Pages Classification Model Based on Integrated Ontology .................................................... 1
  Bai Rujiang, Wang Xiaoyue, and Hu Zewen

AgentSpeak (L) Based Testing of Autonomous Agents ................. 11
  Shafiq Ur Rehman and Aamer Nadeem

A Flexible Methodology of Performance Evaluation for Fault-Tolerant Ethernet Implementation Approaches......................... 21
  Hoang-Anh Pham, Dae Hoo Lee, and Jong Myung Rhee

Behavioral Subtyping Relations for Timed Components ................. 26
  Youcef Hammal

A Quantitative Analysis of Semantic Information Retrieval Research Progress in China .............................................. 36
  Xiaoyue Wang, Rujiang Bai, and Liyun Kang

Applying Evolutionary Approaches to Data Flow Testing at Unit Level ........................................................................ 46
  Shaukat Ali Khan and Aamer Nadeem

Volume-Rendering of Mitochondrial Transports Using VTK ............. 56
  Yeonggul Jang, Hackjoon Shim, and Yoojin Chung

Model Checking of Transition-Labeled Finite-State Machines .......... 61
  Vladimir Estivill-Castro and David A. Rosenblueth

Development of Intelligent Effort Estimation Model Based on Fuzzy Logic Using Bayesian Networks ................................. 74
  Jahangir Khan, Zubair A. Shaikh, and Abou Bakar Nauman

A Prolog Based Approach to Consistency Checking of UML Class and Sequence Diagrams ............................................. 85
  Zohaib Khai, Aamer Nadeem, and Gang-soo Lee

A UML Profile for Real Time Industrial Control Systems ............... 97
  Kamran Latif, Aamer Nadeem, and Gang-soo Lee

A Safe Regression Testing Technique for Web Services Based on WSDL Specification .................................................... 108
  Tehreem Masood, Aamer Nadeem, and Gang-soo Lee
