Frontiers eBook Copyright Statement

The copyright in the text of individual articles in this eBook is the property of their respective authors or their respective institutions or funders. The copyright in graphics and images within each article may be subject to copyright of other parties. In both cases this is subject to a license granted to Frontiers.

The compilation of articles constituting this eBook is the property of Frontiers.

Each article within this eBook, and the eBook itself, are published under the most recent version of the Creative Commons CC-BY licence.

The version current at the date of publication of this eBook is CC-BY 4.0. If the CC-BY licence is updated, the licence granted by Frontiers is automatically updated to the new version.

When exercising any right under the CC-BY licence, Frontiers must be attributed as the original publisher of the article or eBook, as applicable.

Authors have the responsibility of ensuring that any graphics or other materials which are the property of others may be included in the CC-BY licence, but this should be checked before relying on the CC-BY licence to reproduce those materials. Any copyright notices relating to those materials must be complied with.

Copyright and source acknowledgement notices may not be removed and must be displayed in any copy, derivative work or partial copy which includes the elements in question.

All copyright, and all rights therein, are protected by national and international copyright laws. The above represents a summary only. For further information please read Frontiers' Conditions for Website Use and Copyright Statement, and the applicable CC-BY licence.

About Frontiers

Frontiers is more than just an open-access publisher of scholarly articles: it is a pioneering approach to the world of academia, radically improving the way scholarly research is managed. The grand vision of Frontiers is a world where all people have an equal opportunity to seek, share and generate knowledge. Frontiers provides immediate and permanent online open access to all its publications, but this alone is not enough to realize our grand goals.

Frontiers Journal Series

The Frontiers Journal Series is a multi-tier and interdisciplinary set of open-access, online journals, promising a paradigm shift from the current review, selection and dissemination processes in academic publishing. All Frontiers journals are driven by researchers for researchers; therefore, they constitute a service to the scholarly community. At the same time, the Frontiers Journal Series operates on a revolutionary invention, the tiered publishing system, initially addressing specific communities of scholars, and gradually climbing up to broader public understanding, thus serving the interests of the lay society, too.

Dedication to Quality

Each Frontiers article is a landmark of the highest quality, thanks to genuinely collaborative interactions between authors and review editors, who include some of the world's best academicians. Research must be certified by peers before entering a stream of knowledge that may eventually reach the public - and shape society; therefore, Frontiers only applies the most rigorous and unbiased reviews. Frontiers revolutionizes research publishing by freely delivering the most outstanding research, evaluated with no bias from both the academic and social point of view. By applying the most advanced information technologies, Frontiers is catapulting scholarly publishing into a new generation.

What are Frontiers Research Topics?

Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: researchtopics@frontiersin.org

ADVANCEMENTS IN TECHNOLOGY-BASED ASSESSMENT: EMERGING ITEM FORMATS, TEST DESIGNS, AND DATA SOURCES

Topic Editors:

Frank Goldhammer, Leibniz Institute for Research and Information in Education (DIPF), Germany

Ronny Scherer, Centre for Educational Measurement, Faculty of Educational Sciences, University of Oslo, Norway

Samuel Greiff, University of Luxembourg, Luxembourg

Citation: Goldhammer, F., Scherer, R., Greiff, S., eds. (2020). Advancements in Technology-Based Assessment: Emerging Item Formats, Test Designs, and Data Sources. Lausanne: Frontiers Media SA. doi: 10.3389/978-2-88963-506-1

Table of Contents

- 05** *Editorial: Advancements in Technology-Based Assessment: Emerging Item Formats, Test Designs, and Data Sources*
Frank Goldhammer, Ronny Scherer and Samuel Greiff
- 09** *Assessment of Unilateral Spatial Neglect Using a Free Mobile Application for Italian Clinicians*
Pietro Cipresso, Elisa Pedroli, Silvia Serino, Michelle Semonella, Cosimo Tuena, Desirée Colombo, Federica Pallavicini and Giuseppe Riva
- 20** *Virtual Reality as a New Approach for Risk Taking Assessment*
Carla de-Juan-Ripoll, José L. Soler-Domínguez, Jaime Guixeres, Manuel Contero, Noemi Álvarez Gutiérrez and Mariano Alcañiz
- 28** *Automated Feedback Can Improve Hypothesis Quality*
Karel A. Kroeze, Stéphanie M. van den Berg, Ard W. Lazonder, Bernard P. Veldkamp and Ton de Jong
- 42** *The Influence of Variance in Learner Answers on Automatic Content Scoring*
Andrea Horbach and Torsten Zesch
- 56** *Multiple-Choice Item Distractor Development Using Topic Modeling Approaches*
Jinnie Shin, Qi Guo and Mark J. Gierl
- 70** *The Expanded Evidence-Centered Design (e-ECD) for Learning and Assessment Systems: A Framework for Incorporating Learning Goals and Processes Within Assessment Design*
Meirav Arieli-Attali, Sue Ward, Jay Thomas, Benjamin Deonovic and Alina A. von Davier
- 87** *Development of a Computerized Adaptive Testing for Internet Addiction*
Yong Zhang, Daxun Wang, Xuliang Gao, Yan Cai and Dongbo Tu
- 99** *Validation of Embedded Experience Sampling (EES) for Measuring Non-cognitive Facets of Problem-Solving Competence in Scenario-Based Assessments*
Andreas Rausch, Kristina Kögler and Jürgen Seifried
- 115** *Evaluating Different Equating Setups in the Continuous Item Pool Calibration for Computerized Adaptive Testing*
Sebastian Born, Aron Fink, Christian Spoden and Andreas Frey
- 129** *Collaborative Problem Solving: Processing Actions, Time, and Performance*
Paul De Boeck and Kathleen Scalise
- 138** *Making the Psychological Dimension of Learning Visible: Using Technology-Based Assessment to Monitor Students' Cognitive Development*
Gyöngyvér Molnár and Benő Csapó
- 154** *The Skilled, the Knowledgeable, and the Motivated: Investigating the Strategic Allocation of Time on Task in a Computer-Based Assessment*
Johannes Naumann

- 171** *Fine-Grained Assessment of Children's Text Comprehension Skills*
Marije den Ouden, Jos Keuning and Theo Eggen
- 183** *Online Diagnostic Assessment in Support of Personalized Teaching and Learning: The eDia System*
Benő Csapó and Gyöngyvér Molnár
- 197** *The Argument for a "Data Cube" for Large-Scale Psychometric Data*
Alina A. von Davier, Pak Chung Wong, Steve Polyak and Michael Yudelson
- 211** *The Onset of Rapid-Guessing Behavior Over the Course of Testing Time: A Matter of Motivation and Cognitive Resources*
Marlit Annalena Lindner, Oliver Lüdtke and Gabriel Nagy
- 226** *The u-can-act Platform: A Tool to Study Intra-individual Processes of Early School Leaving and its Prevention Using Multiple Informants*
Frank J. Blaauw, Mandy A. E. van der Gaag, Nick R. Snell, Ando C. Emerencia, E. Saskia Kunnen and Peter de Jonge
- 241** *What Technology Can and Cannot Do to Support Assessment of Non-cognitive Skills*
Vanessa R. Simmering, Lu Ou and Maria Bolsinova
- 247** *Combining Text Mining of Long Constructed Responses and Item-Based Measures: A Hybrid Test Design to Screen for Posttraumatic Stress Disorder (PTSD)*
Qiwei He, Bernard P. Veldkamp, Cees A. W. Glas and Stéphanie M. van den Berg
- 259** *Predictive Feature Generation and Selection Using Process Data From PISA Interactive Problem-Solving Items: An Application of Random Forests*
Zhuangzhuang Han, Qiwei He and Matthias von Davier
