18th „Building Services, Mechanical and Building Industry days”
International Conference, 11-12 October 2012, Debrecen, Hungary

Dear Reader,

The University of Debrecen, Faculty of Engineering and the Hungarian Academy of Sciences Debrecen Branch on 11th and 12th of October 2012 organized the

18th Building Services, Mechanical and Building Industry days International Conference.

The conference has sessions related to building service systems, sustainable energy, mechanics, environmental engineering and management. This electronic proceeding contains the articles accepted by the Scientific Committees of mentioned Sections sent by authors from different countries (Finland, Hungary, Germany, Romania, Slovakia, etc).

The Organizers express their thanks to authors for considering our Conference and for reviewers for their work.

Debrecen, 30th of September 2012.

18th „Building Services, Mechanical and Building Industry days”
International Conference, 11-12 October 2012, Debrecen, Hungary

CONTENT

Tamás GÁL, János UNGER <i>Theoretical and climatologically potential solar energy gain of the building roofs in a densely built urban area</i>	EUG-12-01
Tamás BUDAY, Imre TÖRÖK <i>Possibilities and problems in the modelling of operating borehole heat exchanger (BHE) systems based on field studies</i>	EUG-12-02
Thomas DAVID, Tom HASELMAYR <i>GIS-based analysis of renewable energy potentials in urban space</i>	EUG-12-03
Tamás CSOKNYAI, János TÓTH <i>Heat cost allocation in the practice</i>	EUG-12-04
Zsuzsa SZALAY <i>Are nearly-zero energy buildings worth it? A life cycle perspective</i>	EUG-12-05
Mariana BRUMARU, Nicoleta COBIRZAN <i>Implications of nZEB target in the Recast EPBD for the Romanian residential building stock</i>	EUG-12-06
Roman RABENSEIFER <i>Environmental assessment of buildings</i>	EUG-12-07
Attila TALAMON, Erzsébet CZINGER, Virág ZSÁR, Erika BAKSICS, Nóra HESS <i>Strategy to shape public attitudes on energy efficiency</i>	EUG-12-08
Tamás PÁLVÖLGYI, Tamás CSOKNYAI, Nóra HESS, Gábor SZENDRŐ, Attila TALAMON <i>Remote sensing for energy saving</i>	EUG-12-09
Irina Ioana VONICA, Mariana BRUMARU <i>Accessibility as part of a sustainable society</i>	ENR-12-01
Iulia FECIU, Mariana BRUMARU <i>Comparative study of the conventional and unconventional insulation systems</i>	ENR-12-02
Miklós HORVÁTH, Attila TALAMON <i>Global solar energy trends and Hungary</i>	ENR-12-03
Nóra Orsolya KOVÁCS, Attila TALAMON <i>The appearance of the smart buildings in Hungary</i>	ENR-12-04
Lilla Andrea ÉGERHÁZI, Noémi KÁNTOR, Tamás GÁL <i>Evaluation and modelling the micro-bioclimatological conditions of a popular playground in Szeged, Hungary</i>	ENR-12-05
Istvan VOKONY <i>Reactive power- and voltage regulation in micro grids environment</i>	ENR-12-06
KOCSIS Dénes, HORVÁTH Róbert <i>Műanyagok öregedésvizsgálata</i>	ENV-12-01
Csaba GYENGE, László OLÁH, Calin MARIAN <i>New technology for environmental friendly manufacturing the complex helical surfaces</i>	ENV-12-02
SZÜCS István Róbert, TÖRÖK Tibor <i>Biodegradálható hulladékok anaerob hasznosítási lehetőségei a TEVA gyógyszergyár ZRT.-nél</i> ...ENV-12-03	
GULYÁS Lajos, BODNÁR Ildikó, FÓRIÁN Sándor, KECZÁNNÉ ÜVEGES Andrea, BOROS Norbert <i>Környezeti transzport folyamatok matematikai modellezése MATLAB programrendszerrel</i>	ENV-12-04
