8th Japanese-Hungarian Symposium on Discrete Mathematics and Its Applications

June 4-7, 2013
Veszprém, Hungary

Contents

Preface 7

J. Balogh, C. Palmer: On the tree packing conjecture 9

D. Bednay, S. Bozóki: Constructions for Nontransitive Dice Sets 15

B. Bényi, P. Hajnal: Combinatorics of poly-Bernoulli numbers 25

K. Bérczi, P. Csikvári, E. R. Kovács, L. A. Végh: Splitting property via shadow systems 33

A. Bernáth, Gy. Pap: Blocking optimal arborescences 45

P. Biró, T. Fleiner, R. Irving: Matching Couples with Scarf's Algorithm 55

P. Biró, P. Wojuteczky: Stable Fixtures Problem with Payments 65

A. Blokhuis, A. Brouwer, A. Sali: Note on the size of binary Armstrong codes 69

Cs. Bujtás: Domination game on trees without leaves at distance four 73

L. Buttyán, A. Laszka, D. Szeszlér: A Minimum Cost Source Location Problem for Wireless Sensor Networks 79

K. Buza, I. Galambos: An Application of Link Prediction in Bipartite Graphs: Personalized Blog Feedback Prediction 89

K. Buza, K. Marussy: Hubness-based indicators for semi-supervised time-series classification 97

Cs. Gy. Csehi: The graphicity of the sum of graphic matroids 109

B. Csizmadia, K. Friedl: All Pairs Small Stretch Paths in Weighted Graphs 115

A. Dumitrescu, D. Gerbner, B. Keszegh, Cs. D. Tóth: Covering Paths for Planar Point Sets 121

T. Fleiner, Zs. Jankó, A. Tamura: Stability of generalized network flows 133

P. Frankl, M. Kato, Gy. O. H. Katona, N. Tokushige: Two-colorings with many monochromatic cliques in both colors, and some related problems 143

S. Fujishige: Bisubmodular Polyhedra, Simplicial Divisions, and Discrete Convexity 149

S. Fujita: Monochromatic structure in edge-colored graphs 155

T. Fukunaga: Recent progress on iterative rounding algorithms for degree-bounded network design 159

Z. Füredi: Packing of sets with large transportation distance 169

D. Gerbner, V. Mészáros, D. Pálvölgyi, A. Pokrovskiy, G. Rote: Advantage in the Discrete Voronoi Game 173

E. Győri, Gy. Y. Katona, N. W. Lemons: Hypergrpah Extensions of the Erdős-Gallai Theorem 185

X. Han, Y. Kawase, K. Makino: Online Unweighted Knapsack Problem with Removal Cost 191

D. Herskovics: Generalization of Chen's and Manalastas' conjecture 201

H. Hirai: Discrete Convexity for Multiflows and 0-extensions 209

M. Hirakawa, Y. Yamauchi, S. Kijima, M. Yamashita: Any Max-Cardinality Popular Matching in a Stable Marriage Problem Consists of the Same People 225

É. Hosszu, J. Tapolcai, G. Wiener: On a problem of Rényi and Katona 229

B. Hujter: Integer Carathéodory property of submodular polyhedra 233

Y. T Ikebe, A. Tamura: Stability in Supply Chain Networks: An Approach by Discrete Convex Analysis 243

S. Iwata: A Weighted Linear Matroid Parity Algorithm 251

S. Iwata, M. Takamatsu: On the Kronecker Canonical Form of Singular Mixed Matrix Pencils 261

B. Jackson, V. H. Nguyen: Graded Sparse Graphs and Body-Length-Direction Frameworks 271

T. Jordán, V. H. Nguyen: On universally rigid frameworks on the line 281

N. Kakimura, K. Kawarabayashi: Packing edge-disjoint K_5-immersions in 4-edge-connected graphs 291

N. Kamiyama: A New Approach to the Pareto Stable Matching Problem 301

V. E. Kaszanitzky, Cs. Király: On minimally k-rigid graphs 311

Gy. O. H. Katona: An extremal problem for set families with disjoint shadows 323

H. Kawasaki: Discrete Fixed Point Theorems and Simplicial Decompositions 325

K. Kimura, K. Makino: A Complexity Index for Integer Linear Systems Based on Their Sign Patterns 333

Cs. Király: On maximal independent arborescence-packing 339

T. Király, J. Pap: Stable Multicommodity Flows 347

Z. Király: Shortest paths in mixed graphs and nearly conservative digraphs 355

Z. Király, S. Kisfaludi-Bak: Notes on dual-critical graphs 365

Z. Király, E. R. Kovács: Application of Network Coding for a Wireless Relay Network Model 375

Y. Kobayashi: Triangle-free 2-matchings and M-concave Functions on Jump Systems 383

P. Ligeti: Matrix Posets and Automorphisms 387

K. Murota, A. Shioura: Dijkstra's Algorithm Viewed from Discrete Convex Analysis 393

Y. Otachi: On Low Congestion Spanning Trees 405

Gy. Pap: Weighted Linear Matroid Matching 411

B. Patkós, M. Vizer: Game saturation of intersecting families 415

A. Recski: Matroid Duality and Voltage-Current Symmetries 419

G. Simonyi: Graph capacity problems on permutations 427

T. Soma: Faster Deterministic Algorithms for Matrix Completion Problems 431

N. Sonoda, Y. Yamauchi, S. Kijima, M. Yamashita: A Randomized Streaming Algorithm for Finding Distinction of Frequent Items in Distributed Systems 441

S. Suda, H. Tanaka: A cross-intersection theorem for vector spaces based on semidefinite programming 445

H. Sumita, N. Kakimura, K. Makino: Sparse Linear Complementarity Problems 453

P. G. N. Szabó: Bounds on the number of edges of edge-minimal, edge-maximal and l-hypertrees 463

T. Szkaliczki, A. Sobe, W. Elmenreich, L. Böszörmenyi: Analysis of an Artificial Hormone System 473

S. Tanigawa: Rigidity of Graphs with Symmetry 479

Á. Tóth: The asymptotic value of the independence ratio for the categorical graph power 489

Y. Yamaguchi: Packing A-paths in Group-Labelled Graphs via Matroid Matching 495

Author Index 504
