The Perspectives of Renewable Energy in the Danube Region Conference (26–27 March 2015) and this book of proceedings were financed by the **Deutsche Bundesstiftung Umwelt (DBU)** and co-organised by the Wuppertal Institute, the Institute for Regional Studies of CERS HAS (with its own contribution and partial scientific support from OTKA – Hungarian Scientific Research Fund grant #NK 104985: *New driving forces of spatial restructuring and regional development paths in Eastern Europe at the beginning of 21st century*) and the Regional Committee of Pécs, HAS.

Peer reviewers: László Berényi, Nikolett Deutsch, István Fodor, Willington Ortiz, Éva Pintér, Gábor Pintér, Damir Šljivac, Márta Somogyvári, Dobi Ildikó Wantuchné

CONTENTS

Preface.....	9
INTRODUCTION	
The Signs of Post-Fossil Transition in the Energy Landscapes along the River Danube <i>Márta Somogyvári</i>	19
SYSTEMIC COMPONENTS AND CONSTRAINS	
The Role of Renewable Energy in the Energy Network System of the Danube Region <i>Tamás János Katona</i>	35
Modelling the Integration of Large Energy Storage in the Alpine Region <i>Mathis Buddeke, Christine Krüger, Arjuna Nebel, Frank Merten</i>	46
Ideas of the Renewable Energy in Climate-Strategies of Medium-Size Hungarian Cities <i>Édit Hoyk, András Donát Kovács and Jenő Zsolt Farkas</i>	55
Overview and Perspectives of Renewable Energy Sources in the Danube Region in Croatia <i>Anton Spajić, Stanislav Vezmar, Danijel Topić and Damir Šljivac</i>	64
SOCIAL DOMAIN	
Social Aspects and Challenges of Renewable Energy Usage <i>László Berényi</i>	81
The Theory of Environmental Modernization and its Feasibility Application in Capitalist Economy. The Case of Renewable Energy Diffusion in Romania <i>Dragos Constantin Sanda</i>	88
An analysis of Social Effects of Climate and Energy Usage Moderni- zation: Romanian Green Labor Market <i>Alexandra Luana Sanda (Smarandoiu)</i>	96
ECONOMIC DOMAIN	
Note on the Economics of Renewable Energy Technologies in the Danube region <i>Nikolett Deutsch, Éva Pintér</i>	107

Romanian Electricity Market in the Light of Fast Development of Renewable Energies: General Presentation and Critical Assessment <i>Sorin Cebotari</i>	113
Joint Renewable Energy Support Schemes in the Visegrád Countries <i>Éva Szabina Somossy, Tamás Tóth</i>	125

HYDROPOWER POTENTIAL

Hydro Energy Potential in the Danube Region and in Hungary <i>István Szeredi</i>	139
---	-----

WIND RESOURCES

Perspectives of Wind Energy in the Danube Region <i>Dr. Ildikó Dobi Wantuch</i>	151
Optimization of Wind Farm Location Planning with GIS Methods Based on a Hungarian Case Study Area (Csongrád County) <i>Nándor Csikós, Péter Szilassi</i>	154
The Limits to Wind Energy in Hungary – the Geographical Aspect <i>Béla Munkácsy, Ádám Harmat, Dániel Meleg</i>	166
Statistical Estimation of the Next Day's Average Wind Speed and Wind Power <i>Károly Tar, István Lázár and Renáta Gyarmati</i>	174

GEOHERMAL RESOURCES

Untapped Potentials and Enhanced Use of Deep Geothermal Energy in the Danube Region <i>Annamária Nádor, Szilárd Árvay</i>	195
General overview of RES, focusing on the geothermal energy <i>Klára Szita Tóth, Anna Vizkeleti</i>	204
Geothermal energy applications developed in Bihar County and at University of Oradea <i>Mircea Gordan, Cristian Vancea, Cornelia Gordan, Maria Bittenbinder, Monica Costea</i>	216
Thermal Water Utilization and its Possible Development in the Early 21 st Century in Hajdúság, East Hungary <i>Erika Bódi, Tamás Buday, Réka Lilla Kovács, Richard William McIntosh and Miklós Kozák</i>	227
Effect of the Solar Radiation on Underground Temperature Values and Heat Supply Around a Ground Coupled Heat Pump Based on Meteorological Data, Debrecen <i>Tamás Buday, István Lázár, Gergely Csákberényi-Nagy, Erika Bódi and Tamás Tóth</i>	239

Utilizing Geothermal Energy in Hungary Today <i>Lajos Gööz</i>	251
SOLAR RESOURCES	
Solar Energy Resources in the Danube Region <i>Damir Šljivac</i>	257
Decreasing negative ecological impacts of PV farms: identification of suitable areas in Hungary <i>Lea Végh</i>	267
Cost-Benefit Analysis of Different Photovoltaic Systems in Croatia, Hungary, Serbia and Slovenia <i>Denis Pelin, Sándor Zsolt Kovács, Andrea Suvák, Damir Šljivac, Danijel Topić</i>	278
Applying Solar Energy for Water Heating – a Case Study at a Secondary School in Croatia <i>Marinko Stojkov, Krunoslav Hornung, Ante Čikić, Dražan Kozak, Damir Šljivac, Danijel Topić</i>	291
BIOMASS RESOURCES	
Sugar Beet as a Potential Energy Crop in the Danube Region <i>László Potyondi</i>	307
Reed as a Biomass Resource in the Danube Region – An Assessment of Potentials and Different Utilization Possibilities for Energy Production in Austria <i>Jürgen Krail, Hannes Kitzler, Georg Beckmann, Helmut Plank, Christoph Pfeifer and Doris Rixrath</i>	318
Evaluating the Market Competitiveness of Reed Based Biofuels <i>Doris Rixrath, Jürgen Krail and Arne Ragossnig</i>	335
Biomass transportation into power plants – calculation method of transportation distances <i>Gábor Pintér</i>	348
Editors	357
