Corrigendum

Corrigendum to “Stimulatory effect of ascorbate, the alternative electron donor of photosystem II, on the hydrogen production of sulphur-deprived *Chlamydomonas reinhardtii*” [Int J Hydrogen Energy 37 (2012) 8864–8871]

Valéria Nagy^a, Roland Tengölics^b, Gert Schansker^a, Gábor Rákhely^b, Kornél L. Kovács^b, Győző Garab^{a,*}, Szilvia Z. Tóth^a

^b Department of Biotechnology, University of Szeged, H-6726 Szeged, Hungary

The authors regret that in the above article a *Chlamydomonas reinhardtii* strain was used under the name CC-124. A follow-up comparison of this strain and a standard CC-124 strain originating from the *Chlamydomonas* Resource Center (<http://chlamycollection.org/>) revealed that there are significant physiological and morphological differences between these two strains. Therefore, a new name, S-01, is given to the strain on which our research article was based on. The authors wish to apologize that this error was not identified earlier.
