

ICSTW 2016

Ninth IEEE International Conference on Software
Testing, Verification and Validation Workshops

Chicago, Illinois, 10-15 April 2016

IEEE  computer society
CELEBRATING 70 YEARS

 **ASTQB**
American Software Testing Qualifications Board, Inc.
ISTQB Certification in the U.S.

2016 IEEE International Conference on Software Testing, Verification and Validation Workshops

10–15 April 2016
Chicago, Illinois

Los Alamitos, California
Washington • Tokyo

2016 IEEE International Conference on Software Testing, Verification and Validation Workshops

ICSTW 2016

Table of Contents

Message from the ICST 2016 Chairs.....	x
Message from the InSTA 2016 Chairs.....	xii
Message from the IWCT 2016 Chairs.....	xiii
Message from the MUTATION 2016 Chairs.....	xv
Message from the A-MOST 2016 Chairs.....	xvii
Message from the TAIC PART 2016 Chairs.....	xix

Third International Workshop on Software Test Architecture (InSTA 2016)

Automatic Generation of UTP Models from Requirements in Natural Language	1
<i>Satoshi Masuda, Tohru Matsuodani, and Kazuhiko Tsuda</i>	
A Study on the Effectiveness of Test-Categories Based Test Analysis	7
<i>Tsuyoshi Yumoto, Tohru Matsuodani, and Kazuhiko Tsuda</i>	
Difference in Quality of Test Architecture between Service Providers and Subcontractors	14
<i>Yasuharu Nishi</i>	

Fifth International Workshop on Combinatorial Testing (IWCT 2016)

Combinatorial Testing: From Algorithms to Applications	17
<i>Angelo Gargantini and Rachel Tzoref-Brill</i>	
Coverage, Location, Detection, and Measurement	19
<i>Charles J. Colbourn and Violet R. Syrotiuk</i>	

Session 1: Fault Localization

Evaluating the Effectiveness of BEN in Localizing Different Types of Software Fault	26
<i>Jaganmohan Chandrasekaran, Laleh Sh. Ghandehari, Yu Lei, Raghu Kacker, and D. Richard Kuhn</i>	
Analyzing Minimal Failure-Causing Schemas in Siemens Suite	35
<i>Chiya Xu, Yuanchao Qi, Ziyuan Wang, and Weifeng Zhang</i>	

Session 2: Test Generation

Should We Care about “Don’t Care” Testing Inputs?: Empirical Investigation of Pair-Wise Testing	39
<i>Sergiy Vilkomir and Galen Pennell</i>	
Towards Automatic Cost Model Discovery for Combinatorial Interaction Testing	46
<i>Gulsen Demiroz and Cemal Yilmaz</i>	

Session 3: Test Generation

Pseudo-Exhaustive Testing of Attribute Based Access Control Rules	51
<i>D. Richard Kuhn, Vincent Hu, David F. Ferraiolo, Raghu N. Kacker, and Yu Lei</i>	

Session 4: Modeling and Integration with the Test Process

Combinatorial Testing: Implementations in Solutions Testing	59
<i>Anwar Sherif</i>	
Embedded Functions for Constraints and Variable Strength in Combinatorial Testing	65
<i>George B. Sherwood</i>	
Test Oracles and Test Script Generation in Combinatorial Testing	75
<i>Peter M. Kruse</i>	

Session 5: Applications

Applying a Pairwise Coverage Criterion to Scenario-Based Testing	83
<i>L. du Bousquet, M. Delahaye, and C. Oriat</i>	
Pairwise Coverage-Based Testing with Selected Elements in a Query for Database Applications	92
<i>Koji Tsumura, Hironori Washizaki, Yoshiaki Fukazawa, Keishi Oshima, and Ryota Mibe</i>	

11th International Workshop on Mutation Analysis (MUTATION 2016)

An Experimental Evaluation of Web Mutation Operators	102
<i>Upsorn Praphamontripong, Jeff Offutt, Lin Deng, and JingJing Gu</i>	
On Strong Mutation and Subsuming Mutants	112
<i>Birgitta Lindström and András Márki</i>	
Diversity-Aware Mutation Adequacy Criterion for Improving Fault Detection Capability	122
<i>Donghwan Shin, Shin Yoo, and Doo-Hwan Bae</i>	
Measuring Effectiveness of Mutant Sets	132
<i>Rahul Gopinath, Amin Alipour, Iftekhar Ahmed, Carlos Jensen, and Alex Groce</i>	
Are We There Yet? How Redundant and Equivalent Mutants Affect Determination of Test Completeness	142
<i>Bob Kurtz, Paul Ammann, Jeff Offutt, and Mariet Kurtz</i>	
Nequivack: Assessing Mutation Score Confidence	152
<i>Dominik Holling, Sebastian Banescu, Marco Probst, Ana Petrovska, and Alexander Pretschner</i>	
Code Defenders: A Mutation Testing Game	162
<i>José Miguel Rojas and Gordon Fraser</i>	
SIMULTATE: A Toolset for Fault Injection and Mutation Testing of Simulink Models	168
<i>Ingo Pill, Ivan Rubil, Franz Wotawa, and Mihai Nica</i>	
Relating Code Coverage, Mutation Score and Test Suite Reducibility to Defect Density	174
<i>Dávid Tengeri, László Vidács, Árpád Beszédes, Judit Jász, Gergő Balogh, Béla Vancsics, and Tibor Gyimóthy</i>	

12th Advances in Model-Based Testing Workshop (A-MOST 2016)

Effective Fault Localization Using Dynamic Slicing and an SMT Solver	180
<i>Yoshinao Ishii and Takuro Kutsuna</i>	
Using Petri Nets to Test Concurrent Behavior of Web Applications	189
<i>Sunitha Thummala and Jeff Offutt</i>	
A Model-Based Approach for Product Testing and Certification in Digital Ecosystems	199
<i>Bruno Lima and João Pascoal Faria</i>	
Industrial Evaluation of Test Suite Generation Strategies for Model-Based Testing	209
<i>Johan Blom, Bengt Jonsson, and Sven-Olof Nyström</i>	

Property-Based Testing with FsCheck by Deriving Properties from Business Rule Models	219
<i>Bernhard K. Aichernig and Richard Schumi</i>	

Checking Experiments for Symbolic Input/Output Finite State Machines	229
<i>Alexandre Petrenko</i>	

11th Workshop on Testing: Academia-Industry Collaboration, Practice and Research Techniques (TAIC PART)

Industry-Academia Collaboration in Software Testing: An Overview of TAIC PART 2016	238
<i>Rudolf Ramler, Michael Felderer, Takashi Kitamura, and Darko Marinov</i>	

Session 1

Academic and Industrial Software Testing Conferences: Survey and Synergies	240
<i>Árpád Beszédes and László Vidács</i>	

Session 2

Systematic Analysis of Practical Issues in Test Automation for Communication Based Systems	250
<i>Nikolay Tcholtchev, Martin A. Schneider, and Ina Schieferdecker</i>	
Exploring the Presence of Technical Debt in Industrial GUI-Based Testware: A Case Study	257
<i>Emil Alégroth, Marcello Steiner, and Antonio Martini</i>	

Session 3

Successive Refinement of Models for Model-Based Testing to Increase System Test Effectiveness	263
<i>Ceren Şahin Gebizli, Hasan Sözer, and Ali Özer Ercan</i>	
Experience Report: White Box Test Case Generation for Automotive Embedded Software	269
<i>Andreas Hoffmann, Jochen Quante, and Matthias Woehrle</i>	

Open Session — New Ideas, Experiences and Challenges

Automated Fault-Tolerance Testing	275
<i>Adithya Nagarajan and Ajay Vaddadi</i>	

Session 4

Dynamic Integration Test Selection Based on Test Case Dependencies	277
<i>Sahar Tahvili, Mehrdad Saadatmand, Stig Larsson, Wasif Afzal, Markus Bohlin, and Daniel Sundmark</i>	
A Tool for Automated Inspection of Software Design Documents and Its Empirical Evaluation in an Aviation Industry Setting	287
<i>M. Evren Coşkun, M. Melta Ceylan, Kadir Yiğitözü, and Vahid Garousi</i>	

Session 5

The Effect of Team Exploratory Testing – Experience Report from F-Secure	295
<i>Paula Raappana, Soili Saukkoriipi, Ilkka Tervonen, and Mika V. Mäntylä</i>	
Do Exploratory Testers Need Formal Training? An Investigation Using HCI Techniques	305
<i>Mark Micallef, Chris Porter, and Andrea Borg</i>	
Author Index	315
